ABOUT US
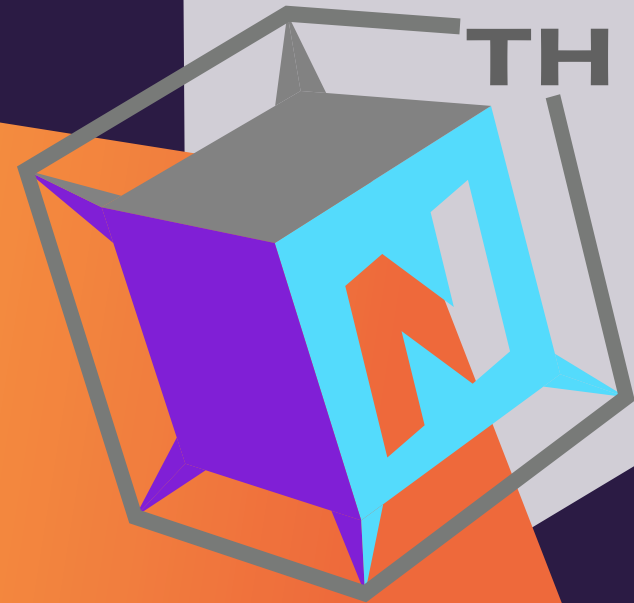

Nth CubEdu is an education and learning program modeled for children who love, enjoy, and want to excel in the field of mathematics, science, and technology. The founder and developer of this program is Dr. Franco, who is also a principal of an elementary school; located in Mountain View.

The program is designed to expose various challenges and problem solving for kids to further train their knowledge and skills sets in those fields. The classes are created for children of all ages ranging from kindergarten to sixth grade. Some of the classes include coding, lab experiments, mathematical problems, and so on.
